For decades, Synflex® thermoplastic hose and tubing has been replacing rubber hose or metal tubing designs. Synflex hose and tubing offers customers a number of benefits, including flexibility, durability, abrasion resistance, lighter weight materials, superior chemical resistance, variety of colors, high pressure capability and extended product performance.

Synflex, hose, tubing, fittings and accessories are available through distributors and direct sales offices throughout North America, Europe, Brazil and Asia.

Many locations also supply custom hose assemblies for specific applications and general industrial purposes.

This catalog contains the most popular lines of Synflex hose and tubing products. If these do not fit your particular needs, or you require a custom design, please contact Eaton customer service. As a customer-focused organization, satisfying customer needs with new products and innovative solutions is our goal.

Warranty

Current warranty information can be found at:
www.eaton.com/hydraulics/warranty

WARNING

Flexible hose lines offer many advantages over rigid tubing including routing ease, vibration absorption, sound deadening and the ability to accommodate movement of connected components. However, hose lines require caution in use not only to provide long service, but also to guard against potentially dangerous failure.

Important

The user should carefully observe the precautions listed in this catalog or brochure, including the recommendations on the selection of hose and fittings, and on fluid compatibility. In addition, care should be taken not to exceed the minimum bend radius listed for each hose size and type in the hose section. Maximum operating pressure should not exceed pressures listed in the hose data. Instructions for assembling fittings to different hose should be followed carefully to ensure the performance of the completed assembly.

WARNING

Eaton fitting tolerances are engineered to match approved Eaton Synflex hose tolerances. The use of Eaton fittings on hose supplied by other manufacturers and/or the use of Eaton hoses with fittings supplied by other manufactures may result in the production of unreliable and unsafe hose assemblies and is neither recommended nor authorized by Eaton or any of its affiliates or subsidiaries.

WARNING

Application considerations must be observed in selecting appropriate components for the application of these products contained herein. The failure to follow the recommendations set forth in this catalog may result in an unstable application which may result in serious personal injury or property damage.

EATON OR ANY OF ITS AFFILIATES OR SUBSIDIARIES SHALL NOT BE SUBJECT TO AND DISCLAIMS ANY OBLIGATIONS OR LIABILITIES (INCLUDING BUT NOT LIMITED TO ALL CONSEQUENTIAL, INCIDENTAL AND CONTINGENT DAMAGES) ARISING FROM TORT CLAIMS (INCLUDING WITHOUT LIMITATION NEGLIGENCE AND STRICT LIABILITY) OR OTHER THEORIES OF LAW WITH RESPECT TO ANY HOSE ASSEMBLIES NOT PRODUCED FROM GENUINE SYNPLEX HOSE FITTINGS, HOSE AND SYNPLEX APPROVED EQUIPMENT, AND IN CONFORMANCE WITH EATON'S SYNPLEX PROCESS AND PRODUCT INSTRUCTIONS FOR EACH SPECIFIC HOSE ASSEMBLY.

FAILURE TO FOLLOW THESE PROCESSES, PRODUCT INSTRUCTIONS, AND LIMITATIONS COULD LEAD TO PREMATURE HOSE ASSEMBLY FAILURES RESULTING IN PROPERTY DAMAGE, SERIOUS INJURY, OR DEATH.

Routing

If the user follows the recommendations on hose line routing and installation as provided for herein, improved safety and longer service life of any hose installation will result.

Hose Installation

Proper installation of the hose is essential to the proper operation and safe use of the hose and related equipment. Improper installation of the hose can result in serious injury or property damage caused by spraying fluids or flying projectiles. In order to avoid serious bodily injury or property damage resulting from improper installation of the hose, you should carefully review the information in this catalog regarding hose installation.

Some of the factors you must consider in installing the hose properly are:

- Changes in length
- Proper bend radius
- Protection from high temperature sources
- Elbows and adapters to relieve strain
- Rubbing or abrasion
- Twisting
- Improper hose movement

These factors and the other information in this catalog regarding hose installation should be considered by you before installing the hose. If you have any questions regarding proper hose installation, please contact Eaton Technical Support at 1-888-258-0222.

Hose Maintenance

Proper maintenance of the hose is essential to the safe use of the hose and related equipment. Hose should be stored in a dry place. Hose should also be visually inspected. Any hose that has a cut or gouge in the cover that exposes the reinforcement should be retired from service. Hoses should also be inspected for kinking or broken reinforcement. If the outside diameter of the hose is reduced by 20% at the spot where it is bent then the hose should be retired from service. Inadequate attention to maintenance of the hose can result in hose leakage, bursting, or other failure which can cause serious bodily injury or property damage from spraying fluids, flying projectiles, or other substances.

Synflex Hose, Hose Fittings and Assembly Equipment Compatibility

Eaton equipment, Eaton hose fittings, and Eaton hose have been engineered and designed as a complete hose assembly system. Each component of the Synflex hose assembly system is compatible with other approved Eaton components to which it relates. Component compatibility, along with the use

of quality components, insures the production of reliable hose assemblies when properly assembled. Intermixing of fittings and hose not specifically engineered and designed for use with each other and Eaton equipment is not recommended and may result in the production of unsafe or unreliable hose assemblies. This can result in hose assembly leakage, hose separation or other failures which can cause serious bodily injury or property damage from spraying fluids, flying projectiles, or other substances. The Eaton warranty is limited to apply only when approved Eaton hose fittings and compatible Eaton Synflex hose are used with Eaton assembly equipment.

Hose and Field Attachable Hose Fittings

Synflex hose and Eaton's field attachable hose fittings have been engineered and designed as a complete system. Component compatibility along with the use of quality components insures the production of reliable hose assemblies when properly assembled. Intermixing fittings and hose not specifically engineered and designed for use with each other may result in the production of unsafe or unreliable hose assemblies. This can result in hose assembly leakage, hose separation, or other failures which can cause serious bodily injury or property damage from spraying fluids, flying projectiles, or other substances. The Eaton warranty is limited and applies only when Eaton's field attachable hose fittings are used on compatible Eaton hoses. See www.eaton.com/hydraulics/warranty for warranty information.

Hydraulic Hose

Synflex Hose Part Number Nomenclature	A2-3
Low Pressure Hose	A4
Medium Pressure Hose (Conductive & Non-Conductive)	A5-8
Constant Pressure Hose	A9-10
High Pressure Hose (Conductive & Non-Conductive)	A11-13
Very High Pressure Hose (Conductive & Non-Conductive)	A14-15
Twin Line, Tri-Line and Multi-Line Hose	A16

A hose part number is composed of several different elements, all combined to make the final number. The following is a diagram of an example hose part number and the elements that go into creating that number.

The hose base number indicates the specific Synflex hose. This is followed by a dash separating the base hose number from the hose size.

The hose size is separated by another dash from the hose length. Hose length is in feet and is immediately followed by the packaging code.

Our example part number shows a Synflex 3130 hydraulic hose in a -04 or 1/4-inch size in a length of 250 feet. BX is the package code for a box or carton.

Synflex Hose

Part Number Nomenclature

Base Hose Number

The base hose number is simply the type of Synflex hose you wish to order. Base hose numbers are found at the top of each page within the hose section of the catalog as well as in the hose specification charts found on each hose page therein.

Hose Size

These are two digits after the base hose number. The hose size code follows industry standards and is the inner diameter of the hose in sixteenths of an inch.

Metric equivalents are found with the hose specification charts on each hose page within the hose section of the catalog.

Hose Size	Hose I.D. in 1/16 Inch
-02	1/8"
-03	3/16"
-04	1/4"
-05	5/16"
-06	3/8"
-08	1/2"
-10	10/16"
-12	3/4"
-16	1"

Twin, Tri, or Multi-Lines

For twin-line, tri-line, and multi-line hose assemblies, referenced nomenclature applies. See page A16 for twin-line hose part numbers that are stock items. Contact your Eaton customer service representative for other variations of the multi-line product offering.

Twin-Line, Tri-Line, and Multi-Line Part Nomenclature

X	Number of Bonded Hoses
2	2 Bonded Hose
3	3 Bonded Hose
4	4 Bonded Hose
5	5 Bonded Hose
6	6 Bonded Hose

Hose Length

The hose length is indicated in feet. Metric equivalents are found in the length section of the hose specification charts. Noted below are the standard length options offered for Eaton Synflex hoses.

Packaging

Examples of Synflex packaging codes are provided in the chart below along with a description of the hose length and package configurations.

Example P/Ns	Length and Package Options
3130-12-200BX	Exact total footage in one to two pieces packaged in a box with no length less than 20 ft. (200 foot box in -12 and -16 sizes only)
3130-04-250BX	Exact total footage in one to two pieces packaged in a box with no length less than 20 ft.
3130-04-500R	Exact total footage in one to three pieces packaged on a reel with no length less than 50 ft.
37AL-06-500RC	Exact total footage in one continuous piece packaged on a reel. Currently available on select hose styles and sizes.
3130-04	Bulk hose - total order quantity shipped will be $\pm 15\%$ of the original quantity ordered. Balance of open quantity will be canceled as the order will be considered shipped complete. Minimum order quantity is 30 feet.
3130-04-06000	Standard Eaton cut length part number structure. Example: 06000 = 600 inches; last digit is 1/8 of an inch.

Cut Length Hose

Cut lengths of hose should be ordered as shown below by specifying lengths in inches.

First four digits are in inches and the last digit is in 8ths of an inch: 00484 = 4 ft 1/2 inches

Note: Length tolerance for hose, assemblies and sleeves is:
 Up to and including 12 inches: $\pm 1/8"$
 Above 12 inches to and including 18 inches: $\pm 3/16"$
 Above 18 inches to and including 36 inches: $\pm 1/4"$
 Above 36 inches: $\pm 1\%$ of length

Bulk Hose

Bulk hose should be ordered by specifying length in feet as shown below.

3R30

Low Pressure

Meets or exceeds SAE 100R3

Construction:

Tube: Nylon-lined

Reinforcement:
Spiral synthetic fiber (-03 through -06)
Braided synthetic fiber reinforcement (-08)

Cover: Black perforated polyurethane

Operating Parameters:

Temperature Range
-40°C to +100°C
(-40°F to +212°F)
or
-40°C to +66°C
(-40°F to +150°F)
with water-based, or
fire-resistant, fluids

Change in working length at
working PSI ±2%

Applications:

- Low-pressure hydraulics (hospital beds)
- Hand tools: air power tools (impact tools, nail guns, staple guns and tire inflation)
- Lubrication systems
- Pressure wash hose
- Cooling mist systems

Features:

- Meets SAE 100R3 specifications
- Low volumetric expansion

SAE100R7 does not apply to 0.125" size. The Nylon core tube is a single wall and not bonded to the reinforcement.

Construction:

Tube: Nylon-lined

Reinforcement: Spiral or braided synthetic fiber

Cover: Black perforated polyurethane

Operating Parameters:

Temperature Range

-40°C to +100°C
(-40°F to +212°F)

or

-40°C to +66°C
(-40°F to +150°F)
with water-based, or fire-resistant, fluids

Change in working length at working PSI $\pm 2\%$

Applications:

- General hydraulics
- Material handling
- Forklifts
- Chemical transfer
- Marine steering

Features:

- Meets or exceeds SAE 100R7 specifications
- Low elongation

Construction:

Tube: Polyester

Reinforcement: Braided synthetic fiber

Cover: Orange, non-perforated, non-stick polyurethane

Operating Parameters:

Temperature Range
-54°C to +100°C
(-65°F to +212°F)

or

-40°C to +60°C
(-40°F to +140°F)
with water-based or
fire-resistant fluids

Change in working length at
working PSI $\pm 2\%$

Applications:

- Electric utility truck
- Hydraulic systems
- Mobile equipment (pickers, utility vehicles)

Features:

- SAE J517 non-conductive hose construction
- Complies with ANSI A92.2 for vehicle-mounted, aerial devices (i.e., AL)
- Less than 50 micro-amperes leakage when subjected to 75,000 volts/ft for five minutes

Construction:**Tube:** Polyester**Reinforcement:** Braided, bronze-coated steel wire**Cover:** Black non-perforated, polyurethane**Operating Parameters:**

Temperature Range

-40°C to +107°C
(-40°F to +225°F)

or

-40°C to +60°C
(-40°F to +140°F)
with water-based, or
fire-resistant, fluidsChange in working length at
working PSI $\pm 2\%$ **Applications:**

- Lubrication systems
- General mobile hydraulics
- Agriculture equipment

Features:

- Meets or exceeds SAE 100R1 and 100R7 performance specifications
- Steel wire reinforcement
- Cut resistant, heavy-duty design
- Crush resistant

Construction:

Tube: Polyester

Reinforcement: Braided synthetic fiber

Cover: Black perforated, non-stick polyester

Operating Parameters:

Temperature Range

-54°C to +94°C
(-65°F to +200°F)
with water-based, or
fire-resistant, fluids

Change in working length at
working PSI $\pm 2\%$

Applications:

- Forklifts
- Construction
- General hydraulics
- Chemical and gas transfer
- Agricultural equipment
- Material handling
- Freezer applications
- Machine tools and robotics
- Lubrication equipment
- Portable hydraulic tools

Features:

- Highly flexible, even in cold temperatures

- Mobile machinery
- Aerial equipment

Features:

- SAE J517 non-conductive hose construction. Less than 50 micro-amperes leakage when subjected to 75,000 volts/ft for five minutes
- Compact size
- Low elongation

**3VE0 Hose Assembly****Includes:**

- 3VE0 hose
- 90V permanent steel fitting
- 45J0 hose guard
- Warning tag

3130, 37AL and 30CT

Twin-Line, Tri-Line, Multi-Line

3130 Medium Pressure Hose

Meets or exceeds SAE 100R7 specifications

# Part Number	Hose Series	Number of Hose	 Nominal I.D.		 Length	
			mm	in	m	ft
3130-04-2-250BX*	3130-04	2	6,3	0.25	76,2	250

*Reel packaged part numbers listed.
‡ Run-to-order hose. Contact your Eaton representative for details.

Construction:

Tube: Polyvinylchloride (PVC)
Reinforcement: Spiral synthetic fiber
Cover: Perforated polyvinylchloride (PVC)

Operating Parameters:

Temperature Range
-23°C to +66°C
(-10°F to +150°F)
or
-23°C to 54°C
(-10°F to 130°F)
with 390C brass fittings

Applications:

- Air power tools (impact tools, nail guns, stapler guns, tire inflation)
- Pneumatic motion control
- Industrial water supply line

Features:

- Standard colors: gray, red, blue, yellow or black
- Excellent abrasion and impact resistance
- Lightweight
- 4:1 burst to working pressure safety factor
- Long life over rubber hose

Note: Always use accepted cleaning practices to clean finished hose assembly before use.

Construction:

Tube: Polyolefin

Reinforcement: Synthetic fiber

Cover: Blue, non-perforated polyurethane

Operating Parameters:

Temperature Range

-23°C to +66°C
(-10°F to +150°F)

Applications:

- Pure water transfer
- Deionized water
- Distilled water
- Potable water
- Food products

Features:

- Made with NSF approved materials
- Core tube is free of plasticizers
- Prevents moisture transmission, extraction of contaminants
- Long lengths available

Agency Listings:

U.S. Navy
(MIL-STD-767A Ships)
NSF-51 and NSF-61 Certified

Construction:

Tube: Polyolefin
Reinforcement: Synthetic fiber
Cover: Perforated polyurethane

Operating Parameters:

Temperature Range
-23°C to +66°C
(-10°F to +150°F)

Applications:

- Conveying urethane foam components
- Moisture sensitive chemicals

Features:

- High moisture barrier core tube
- No plasticizers in the core tube
- UV resistant cover
- Custom colors available

Construction:

Tube: Polyester lined

Reinforcement: Synthetic fiber

Cover: Yellow perforated polyvinylchloride (PVC)

Agency Listings:

Meets MIL-H-2815 off-gassing requirements

Operating Parameters:

Temperature Range

-26°C to +66°C
(-15°F to +150°F)

Applications:

- Self-contained rescue air tanks
- Breathing air lines for asbestos removal
- Sand blasting breathing apparatus

Features:

- Bright, safety-yellow cover
- Light weight, kink-resistance design
- Clean, non-contaminating thermoplastic core tube
- Abrasion resistant cover

Construction:

Tube: Nylon
Reinforcement: Synthetic fiber
Cover: Black perforated polyurethane

Agency Listings:

AGA approved and listed
ANSI/IAS NGV 4.2 and CSA
12.52 compliant for dispensing systems

Conforms to appropriate sections of NFPA 52

Operating Parameters:

Temperature Range
-40C to +66°C
(-40F to +150°F)

Applications:

- CNG refueling dispensers
- CNG transfer lines
- High-pressure CNG lines

Features:

- Dissipates static electricity
- Low volumetric expansion
- UV resistant cover
- Twin-line designs available with vent hose
- Designed for electrically conductive fittings

*Available lengths consist of 76,2 m (250 ft) continuous reels. Example: 4212-21603 consists of four 76,2 m (250 ft) reels equating to (1000 ft).

Construction:

Tube: Heat and light stabilized Nylon 11 or Nylon 12 resin

Operating Parameters:

Temperature Range
-40°C to +93°C
(-40°F to +200°F)

Applications:

- Low-pressure hydraulic
- Chemical transfer service
- Pneumatic systems

Features:

- Premium quality flexible tubing
- High dimensional stability
- Low moisture absorption
- Chemical resistant
- UV and ozone resistant
- Light weight

Agency Listings:

DOT-FMVSS 106
(49 CFR571.106)
SAE J844

Operating Parameters:

Temperature Range
-54°C to +93°C
(-65°F to +200°F)

Applications:

- Articulating connections for air brake line systems (connections between towed and towing motor vehicle)
- Tractor-to-trailer air connections used in extremely low temperatures

Features:

- Superior abrasion resistance
- Excellent return and coil memory
- Enhanced flexibility and extension
- Brass end fittings with corrosion resistant spring guards

*Master pack quantity part numbers listed. For master pack configuration information refer to chart below.

Construction:

UV stabilized,
thermoformable

Agency Listings:

Meets the performance of
SAE J844, J1131, J2494-3
DOT-FMVSS 106

Operating Parameters:

Temperature Range
-54°C to +93°C
(-65°F to +200°F)

Applications:

- Truck air brake systems
- Trailer air brake systems
- Auxiliary air systems
- Formed tubes
- Formed and straight air brake harness assemblies

Features:

- Superior abrasion resistance
- Ease of cutting
- Enhanced flexibility and extension
- Flow performance
- Standard and custom colors
- Available in all standard sizes

*Random length box packaged part numbers listed. Other packaging options available. See Customer Connect or contact your Eaton customer service representative.

Construction:

Tube: Nylon 12

Cover: Thermoplastic

Operating Parameters:

Temperature Range
-40°C to +93°C
(-40°F to +200°F)

Applications:

- Designed specifically for diesel fuel applications
- Transportation – trucks, buses and off-highway vehicles, construction machinery and equipment
- Agriculture machinery and equipment
- Marine, boats and yachts
- Diesel engines and generators

Features:

- Lightweight fuel tube assemblies can weigh up to 66% less
- Well suited for formed fuel harness applications
- Multiple color options
- Bulk, pre-cut with or without barbed fitting
- Excellent cost/value

Qualified Fittings:

Contact your Eaton account sales manager for composite and metal fitting options.

Operating Parameters:

Temperature Range

-45°C to +122°C
(-50°F to +250°F)

Applications:

- Formed or unformed harnesses
- Transportation – trucks, buses and off-highway vehicles
- Construction machinery and equipment
- Agriculture machinery and equipment
- Marine, boats and yachts
- Diesel engines and generators

Features:

- Excellent flexibility
- Well suited for individual line installation
- Multiple colors
- Designed specifically for diesel fuel applications
- Pre-cut with or without barbed fitting
- Lightweight fuel tube assemblies can weigh up to 66% less
- Excellent cost/value

Qualified Fittings:

Contact your Eaton account sales manager for composite and metal fitting options

4KGEN-08-001
Fuel Tubing Extension Kit

Part Number	Hose Size	DN	Description	Qty	Unit of Measure
4408-08710	-08	12	Plastic female fitting	4	Pieces
4408-08610	-08	12	Plastic 90° fitting	2	Pieces
4408-08310	-08	12	Plastic straight fitting	2	Pieces
4294-0810K	-08	12	Black fuel tubing	25	Feet
4294-081FK	-08	12	Silver fuel tubing	25	Feet

4KGEN-10-001
Fuel Tubing Extension Kit

Part Number	Hose Size	DN	Description	Qty	Unit of Measure
4408-10710	-10	16	Brass female fitting	4	Pieces
4408-10610	-10	16	Plastic 90° fitting	2	Pieces
4408-10310	-10	16	Plastic straight fitting	2	Pieces
4297-1010X001	-10	16	Black fuel tubing	25	Feet
4297-101FX-001	-10	16	Silver fuel tubing	25	Feet

Kit Contents:

- OEM male, female, straight and 90 degree VOSS barbed fittings
- Synflex 4294 or 4297 series tubing

Applications:

- Transportation – trucks, buses, off-highway
- Construction machinery and equipment
- Agriculture machinery and equipment
- Diesel engines and parts

Features:

- Synflex 4KGEN kits can be used to modify tank locations, routings, and repair fuel systems in these and many other applications where diesel fuel is used
- Specifically designed for modification or repair of OEM fuel systems that use Synflex 4294 or 4297 series fuel tubing
- Utilize VOSS OEM barbed end fittings to maintain o-ring sealing end connection of the original OEM fuel system
- OEM colors available to maintain the same OEM color code integrity

Thermoplastic Hose Crimp Sleeves

Synflex Crimp Sleeves

Sleeve Part No.	Hose ID		
	Dash size	DN (mm)	in
FF91064-04S	-4	6	0.25
FF91064-06S	-6	10	0.38
FF91064-08S	-8	12	0.50
FF91064-12S	-12	19	0.75
FF91064-16S	-16	25	1.00

Synflex Qualified Hoses

SAE Standard	Hose	Sizes	Hose Type
100R7	3130	-04 thru -16	Conductive
	3740	-12 thru -16	Non-Conductive
100R8	3R80	-06 thru -16	Conductive
	3E80	-06 thru -16	Non-Conductive

Steel crimp sleeve enables use of Aeroquip TTC and Weatherhead Z Series hose fittings with select conductive and non-conductive Synflex 100R7 and 100R8 hoses.

Markets:

- Material Handling
- Oil & Gas
- Construction
- Agriculture
- Manufacturing

Features:

- Custom blue plating provides corrosion protection and visual indication of use once crimped with hose fitting.
- Sleeve design provides ease of hose and fitting assembly and is qualified for use with Eaton crimp equipment.

Benefits:

- There are over 500 fitting configuration options to choose from with additional jump sizes and terminal ends. Additional options enable the customer to reduce their inventory carrying costs.
- Performance meets or exceeds SAE 100R7 and 100R8 industry standards.

Extended blue sleeve provides visual indication of use.

Sleeve takes shape of socket and does not allow serrations to cut through the hose cover.

TTC Permanent Crimp Fittings (With Sleeve)

Fittings with sleeve for use with hose: 3130 (-04 to -16), 3740 (-12 to -16), 3R80 (-06 to -16), 3E80 (-06 to -16)

* Dash Size = Hose I.D. in 16th of one inch. Example: -03 = 3/16 inch I.D.

** Contact Eaton customer service for availability and fitting configurations.

A fitting part number is composed of several different elements, all combined to make the final number. The following is a diagram of a fitting part number and the elements that go into creating that number:

The fitting prefix plus the fitting type becomes the fitting series. This is followed by the hose size. Then a dash separates the hose size from the end connection size. The terminal end code (may use first two digits of old terminal end code) is followed by a configuration code, which defines the orientation of the fitting. A digit for customer specials follows that. Another dash separates the packaging code from the number.

Fitting Prefix

The fitting prefix is the easiest part of the fitting part number to determine. It is always 9. If a part number begins with "9" you know it is a fitting number.

Fitting Type

There are many different fitting types. They are represented by the second and third digit in the fitting part number.

Chart 1 on page F4 shows the part number character code that corresponds to the fitting type.

Hose Size

These are the fourth and fifth digits in the fitting part number. The hose size code is the diameter of the hose in sixteenths of an inch. In this example, the **code 08** indicates a 1/2" hose diameter, since 8/16" is equal to 1/2 inch. All existing fitting series have fractional hose sizes.

If metric hose sizes become available the two digit diameter code would represent the diameter of the hose in millimeters. 16 = 16mm.

Customer Specials Suffix

Alpha-numeric consecutive suffix. Zero (0) denotes a standard part. M denotes marking with old part number for military purposes.

Packaging

Alpha or numeric code to denote shipping or pack quantity.

Terminal End Configuration

In order to determine the terminal end orientation the terminal end configuration code is assigned. It is the tenth digit in the fitting part number. The configuration code is new to the part numbering system. It reduces the number of end connection codes needed.

Chart 2 below shows the terminal end configuration code.

Chart 2

Code	Configuration
0	Straight
2	22.5° Bend
3	30° Bend
4	45° Bend
5	135° Bend
6	60° Bend
7	67.5° Bend
9	90° Bent tube (no short or long reference)
A	Angle to be specified on print (special)
B	90° Block
E	Long Neck (machined bar or tube)
H	Bulkhead
L	90° Bend, long drop
M	Multiple bends
S	90° Bend, short drop

Terminal End Code

The end connection code defines the style of the terminal end on the fitting. Along with the configuration code it may replace some previous end connection codes.

Chart 3 on pages F5-6 lists the end connection codes. It also shows the terminal end configuration code, and the resultant code. The former code is shown for reference.

Example:

To find the last six digits using the connection type code, end connection configuration code, and the end connector size, simply arrange the codes in the correct order.

Chart 1

Code	Description	Code	Description
01	Reusable, plated steel, medium pressure	0P	Permanently attached, all Monel, medium pressure, 03 style
02	Reusable, plated steel, medium pressure, for 37NC nonconductive hose	0R	Permanently attached, 303/304 stainless, medium pressure 03 style
03	Permanently attached, plated steel, medium pressure	0S	Permanently attached, all Monel, 3R80; OH style
04	Reusable, brass, medium pressure	0T	Permanently attached, Brass, low pressure, trepanned, 3600 hose
05	Permanently attached, brass, high pressure, for breathing gas hose	0V	Permanently attached, plated steel, very high pressure hose
06	Permanently attached, brass, medium pressure, purchased	0W	Permanently attached, plated steel, tube o-ring, refrigerant hose
07	Reusable, 303/304 stainless steel insert, steel shell, 01 style	2V	Permanently attached 316 stainless steel, high pressure, 3390 hose
08	Reusable, 303/304 stainless steel, medium pressure, 01 style	7H	Permanently attached, plated steel, high pressure - metric, BSP, JIS, (non-domestic ends)
09	Reusable, brass, 34MS-05 hose	7N	P/A plated steel, 3350/3360 hose - metric, BSP, JIS, (non-domestic ends)
10	Barbed brass, low pressure	8E	P/A, 316 plated steel, Monel or mild steel, 38LV hose
11	Barbed brass, low pressure	A3	Permanently attached, plated steel, medium pressure
12	P/A, plated steel, medium pressure, 1000 series hose	A4	Permanently attached, Monel, 33CP hose, 904 style
13	P/A, brass, medium pressure, trepanned, swaged	A5	Permanently attached, Monel, 3410 hose, very high pressure, 925 style
53	P/A, plated steel, medium pressure, crimped	A6	Permanently attached, Monel, 3700, 3131, 3000 medium pressure, 926 style
54	P/A, plated steel, Monel, or stainless, 33CP hose	B3	Permanently attached, Monel, 3LVE, 38LV hose, 924 style
55	P/A, plated steel, medium pressure eyeletless crimped, 3420 & 3421 hose	B4	Permanently attached, Monel, 100R8, high pressure, 923 style
56	P/A, 316 plated steel, Monel, or mild steel, 38HW hose	C2	Reusable, 316 stainless, medium pressure, 37AL nonconductive hose, 902 style
73	P/A, plated steel, medium pressure - metric, BSP, JIS, (non-domestic ends)	C4	Permanently attached, stainless steel, 33CP hose, 904 style
0A	Permanently attached, 316 stainless, 903 style	C6	Permanently attached, brass, medium pressure crimp only
0B	Permanently attached, zinc phosphated, 903 style	E2	Reusable, 303/304 stainless, medium pressure, 37AL nonconductive hose, 902 style
0C	Permanently attached, with ferrule, all brass, 3600 & 3630 hose	G3	Permanently attached, plated steel, medium pressure
0D	Permanently attached, Chrome plated brass, low press. Breathing gas hose 3270	AE	Permanently attached, Monel, very high pressure, 902 style
0E	Permanently attached, plated steel, monel or stainless steel, 3LVE hose	AV	Permanently attached, very high pressure, 902 style
0G	Permanently attached, plated steel, medium pressure	CE	Permanently attached, 316 stainless steel, 3LVE hose, 90E style
0H	Permanently attached, plated steel, high pressure	CN	Permanently attached, 316 stainless steel, 3350/3360 hose, 90N style
0J	Reusable, plated steel, high pressure	CV	Permanently attached, 316 stainless steel, very high pressure, 90V style
0K	Reusable, 303/304 stainless steel, high pressure, 0J style	DE	Permanently attached, 316 stainless steel, 38LV hose, 98E style
0L	Permanently attached, 316 stainless steel, high pressure, OH style		
0M	Permanently attached, plated steel, medium pressure, 3500 hose		
0N	Permanently attached, plated steel, 3350 & 3360 hose

Torque Values

Hose Size	in lbs	
	Min	Max
-04	50	150
-05	70	200
-06	90	300
-08	150	500
-10	220	700
-12	300	1,000
-16	450	1,400

The maximum torques listed are based upon strength rather than sealing properties. Use of any torque within the minimum/maximum range will prevent damage or leakage.

See pages H12-15 for die, pusher, and cage information.

Synflex Permanent Swage Fittings

Torque Values

Hose Size	in lbs	
	Min	Max
-04	50	150
-05	70	200
-06	90	300
-08	150	500
-10	220	700
-12	300	1,000
-16	450	1,400

The maximum torques listed are based upon strength rather than sealing properties. Use of any torque within the minimum/maximum range will prevent damage or leakage.

See pages H12-15 for die, pusher, and cage information.

390C series brass fittings are ordered by selecting components from the parts shown to the right and on the next page.

Fittings are intended for use with hose clamps or brass ferrules.

Construction:

- Machined from 360 alloy brass
- Pipe thread manufactured to dryseal specifications
- 3/16" ID hose barb stems contain three barbs
- 1/4" ID and larger contain four barbs

See pages H12-15 for die, pusher, and cage information.

Stand Pipe Stainless Steel (90A)

Coll-O-Crimp

336 'E' Series

Hose End 336 'E' Series

 Refer to important safety information on pages A3.

Ordering Information: Order individually by part number.

Application: General purpose high-pressure hydraulics. Use Synflex 3E80 non-conductive hose where shock hazards exist.

Compatible Hose:
3R80 (-03 to -12), 3E80 (-03 to -12)

Pressure: Determined by maximum operating pressure for hose size and hose end configuration whichever is less.

Material: Low carbon steel

Plating: Zinc; clear trivalent chromate

Advantages: Wide selection of hose and end configurations allowing for a diverse number of applications where hose compatibility is a problem.

Assemble With:
ET1000, ET4000, T-400-1, T-410-1, T-420-1, T-440-1, T-460, T-462, T-465, T-480

Label Set: FS-3500

Note:
Refer to current price list for availability of cataloged items. Configurations and dimensions subject to change without notice.

Weatherhead fittings for Weatherhead customers only.

Coll-O-Crimp

'U' Series

Fittings for use with hose: 3130 (-04 to -12), 37AL (-06 & -08), 3740

Hose End 'U' Series

Collet

Male Pipe Rigid

**Note:**

Refer to current price list for availability of cataloged items. Configurations and dimensions subject to change without notice.

Ordering Information: Order individually by part number. O-rings not supplied with flange hose ends. Order o-rings by catalog number; reference individual listings for details.

Refer to important safety information on pages 3.

Application: General purpose low, medium, and high pressure hydraulic.

Compatible Hose: 3130 (-04 to -12), 37AL (-06 & -08), 3740

Pressure: Determined by maximum operating pressure for hose size and hose end configuration whichever is lesser.

Material: Low carbon steel

Plating: Zinc; clear trivalent chromate

Advantages:

Wide selection of hose and end configurations allowing a diverse number of applications. An ideal series to introduce hydraulics.

Assemble With:

Weatherhead customers use T400-1, T410-1, T420-1, T440, T460, T462, T465, T480, ET1000, ET4000, ET4001, and ET4020.

Aeroquip customers use ET1000.

Label Set: FS-1100

'U' Series fittings are available to Aeroquip customers for use on select Eaton Synflex hose.

Weatherhead 'U' Series fittings available for Aeroquip and Synflex customers.

Thermoplastic Hose Crimp Sleeves

Synflex Crimp Sleeves

Sleeve Part No.	Hose ID		
	Dash size	DN (mm)	in
FF91064-04S	-4	6	0.25
FF91064-06S	-6	10	0.38
FF91064-08S	-8	12	0.50
FF91064-12S	-12	19	0.75
FF91064-16S	-16	25	1.00

Synflex Qualified Hoses

SAE Standard	Hose	Sizes	Hose Type
100R7	3130	-04 thru -16	Conductive
	3740	-12 thru -16	Non-Conductive
100R8	3R80	-06 thru -16	Conductive
	3E80	-06 thru -16	Non-Conductive

Steel crimp sleeve enables use of Aeroquip TTC and Weatherhead Z Series hose fittings with select conductive and non-conductive Synflex 100R7 and 100R8 hoses.

Markets:

- Material Handling
- Oil & Gas
- Construction
- Agriculture
- Manufacturing

Features:

- Custom blue plating provides corrosion protection and visual indication of use once crimped with hose fitting.
- Sleeve design provides ease of hose and fitting assembly and is qualified for use with Eaton crimp equipment.

Benefits:

- There are over 500 fitting configuration options to choose from with additional jump sizes and terminal ends. Additional options enable the customer to reduce their inventory carrying costs.
- Performance meets or exceeds SAE 100R7 and 100R8 industry standards.

Extended blue sleeve provides visual indication of use.

Sleeve takes shape of socket and does not allow serrations to cut through the hose cover.

Fittings for use with hose: 3130 (-04 to -16),
3R80 (-06 to -16), 3E80 (-06 to -16), 3740 (-12 to -16)

Assembly Equipment

Synflex Swaging Machine, Tools and Accessories	H2-3
Eaton Crimping Machine	H4-5
Hose Accessories	H5-8
O-Rings	H9-11
Crimp Die Charts	H12-15
Selection, Installation, and Maintenance.	H16-17
Assembly Instructions	H18-22

Synflex Swaging Machines

SST and Mark IX

Designed to Attach Synflex Permanent Fittings to Synflex Hose

- Synflex swaging equipment produces smooth, uniform fitting surfaces, without raised edges or ridges common in other fitting methods.
- Complete range of fitting swaging pushers and dies up to -16 size are ordered separately.

SST Portable Hand Swager

Part No.: 4530-01002

- Portable hand operated machine for field assembly
- Frame can be attached to bench vise or directly to a table with separate mounting bracket
- Weight: 3.6 kgs (8 lbs)

SST Portable Hand Swager Carrying Case

Part No.: 45J0-05600

Mark IX Swager

Part No.: 45J0-05600

- Fully automatic - opens dies to release completed assembly
- Fast actuation - capable of five-second cycle time
- Three power supply options for a broad range of production needs
- For heavy duty, continuous high-speed production needs the Mark IX can be equipped with a high capacity power unit (see option three below)
- Weight: 59.4 kgs (131 lbs)

Option 1 (Part No.: 4530-009S0)

1HP, 60Hz, 115/208/230V single-phase motor; medium duty

Option 2 (Part No.: 4530-009S1)

1HP, 60 Hz, 230/460V three-phase motor; medium duty

Option 3 - A & B (Part No.: 453C-00020 and Part No.: 4530-009S4)

- (A) Mark IX machine without standard power supply. Part No.: 4530-009S4
- (B) Commercial-duty hydraulic power unit with 5HP, three-phase 230/460V motor, five-gallon reservoir, 4.1 GPM displacement. Part No.: 453C-00020

Pushers

Pusher selection is based on fitting end design chosen from assembly. Pusher part numbers are listed in the fitting tables on pages H12-15.

Example:

To attach a -06 (3/8-inch) hose to a -06 female JIC/SAE 37° swivel fitting (90306-065500), use pusher part number 4599-FP015.

Dies

Swaging dies are applied in paired sets. Die selection is based on hose series and size. Die part numbers are listed in hose selection chart, page H12-15.

Example:

To attach fitting 90306-065500 to a 3130-06 hose, die part number 4540-306 is utilized.

Die and Pusher Storage Rack

Part No.: 45J0-03401

- Rack holds twelve pushers and eight dies
- 16-gauge welded steel frame
- Wall mount or bench top
- Dimensions: 19 inches wide; 22-1/2 inches high; extends 3 inches from mounting surface

Crimping Machines

FT 1380 and T-420

Aeroquip FT1380

The ProCrimp 1380 crimp machine from Eaton crimps all your hose needs up to and including -20 SAE100R12 hose styles and the popular MatchMate Plus hose and fittings program (shown with optional die holder kit FT1380-2-4). The ProCrimp 1380 is electronically controlled to give fast, accurate crimps the first time and every time you need a hose assembly. The electronic keypad is easy to adjust, with up to 10 programmable crimp settings. For hose styles and sizes used less frequently simply enter the 3 digit code of that hose.

Ordering Instructions

See page H12-15 for tooling information.

FT1380-115 115V crimp machine 50/60 Hz

FT1380-2-3 FT1330 to FT1380 Die Cage conversion kit — back plate, bolts and instructions necessary to convert an FT1330 die cage to an FT1380 die cage. Simply remove the FT1330 back plate and replace it with the new FT1380 back plate.

FT1380-2-4 Optional die holder kit — Kit includes 4 die holder plates each of which will hold 2 die cages. Holes are pre-drilled on base of ProCrimp machine to accept these 4 plates.

FT1380-4 Optional fitting backstop-kit includes backstop and 5/32" hex wrench. The backstop allows the 1380 to crimp PTFE hose and be utilized for a fitting locator to increase efficiency.

Electrical Requirements

USA: FT1380-115 standard machine uses 115V, 50/60 Hz, 1.5 hp

Brazil: FT1380-1-2 standard machine uses 230V, 50/60 Hz, 1.5 hp

Australia: FT1380-230 standard machine uses 230V, 50/60 Hz, 1.5 hp

Canada: FT1380-115 standard machine. Requires CSA (Canadian Standards Association) approval. The FT1380-115 is CSA approved and is so noted on the nameplate.

Weatherhead T-420

The Coll-O-Crimp Super I is a versatile machine ideal for your shop, factory, construction, and mine locations. Big capacity combined with lever-activated crimping gives you wide coverage and a quick and simple way to make factory-quality hose assemblies.

Capacity

3/16" I.D. 1 fiber braid through 1-1/4" 6 spiral hose*; for hose other than 4 and 6 spiral, conversion tooling is required.

*Will not crimp 4SP/6SP ends

Mounting

Bench or C-40X cabinet.

Size

22" high, 10" wide, 20-1/2" deep

Weight

210 lbs.

CAUTION

The Coll-O-Crimp power source has the pressure relief valve set at 4000 to 4200 PSI. Damage to the press will result if higher pressures are used and warranty will be voided.

Hose Assembly

Tools & Accessories

Hand-Held Hose Cutter

Part No. 4523-04006

- Handy tool for cutting Synflex hose 1/8-inch to 1/2-inch in diameter. Blades are replaceable. Vinyl cushioned grips.

Replacement Blade

Part No. 4523-04005

Multi-Line Hose Separation Tool

Part No. 4573-00000

- Designed for Separation of tri-, quad- and five-line hose.

Replacement Blades

Part No. 4573-01000

Swage Lubricant

Part No. 4545-01001

- Lubricant for use in the assembly of Synflex reusable and permanently attached stainless steel fittings.

Vise Blocks

Part No. 4504-00000

- 3/16-inch through 1/2-inch hose

Part No. 4504-01000

- 3/4-inch and 1-inch hose. Used in making assemblies.

Twin-Line Hose Separation Tool

Part No. 4574-01000

- Designed for separating Twin-Line hose

Replacement Blades

Part No. 4574-02000

(set of 10)

Insertion Depth Marker

Part No. 45J0-04603

Dies

Part No. 4574-03000-XXX

O-Rings Seal Kit

FF16087-01

Includes metal box, o-rings for ORS -04 through -16, o-rings boss -04 through -16, 24 packages with twelve 90 durometer nitrile o-rings per package. Packages can be ordered individually by part number listed.

BSPP Bonded Seal for DIN 3852-2 Ports

Selection, Installation and Maintenance of Synflex Hose and Assemblies

Proper hose selection, installation and maintenance practices should be followed to ensure that hose and hose assemblies have long life and operate safely. Failure to consider these practices could result in unplanned down-time, damage or injury. The general industry practices assembled below are provided as a guide for hose selection, installation and maintenance. Careful consideration for applying these practices is recommended.

Pressure

Determine the maximum operating system pressure and select a hose that will have a maximum working pressure equal to or in excess of the operation system's maximum pressure. It is very important to take into account surge pressures that may be higher than normal operating pressures.

Temperature

Determine the maximum and minimum operating temperatures and select a hose that is designed for use within this temperature range. Consider transient thermal conditions resulting from startup, heat build up from idling, etc. Special protection from hot equipment may be required.

Chemical and Environmental Resistance

Determine the type and concentration of the fluids and chemicals that will come in contact with the hose core tube I.D. and hose cover. Refer to the hose and tubing sections with product descriptions to identify the types of polymers used to form the core tube and cover. With this information, locate the compatibility rating of the combination of chemicals and/or fluids with the polymer type described in the Chemical Resistance data on pages 112-13. Contact Eaton technical support to request data for chemicals and conditions not listed.

Size

Select the proper I.D. based on system requirements such as fluid flow rate or velocity. The hose selection nomograph on page 14 can help determine the hose I.D.

Electrical Conductivity

Each hose application should be evaluated for the importance of selecting a hose designed to prevent flow of electrical current (e.g. aerial hydraulics) or a hose designed to sufficiently conduct static electricity to safe ground connections. The conducting hose design requires special conducting fittings which should be selected along with the hose.

Figure 1a

Figure 1b

Component Inspection

Prior to installation, inspect hose for I.D. obstruction or damage such as blisters, looseness or cracks in the hose cover and evidence of having been kinked. Check fittings for thread damage or bent fitting components.

Routing

Many problems can be avoided by installing hose and hose assemblies away from hot equipment such as exhaust manifolds. Insulating heat shields may be necessary in some cases (Figure 1).

Minimum Bend Radius

Tight bends (Figure 2) that exceed the hose minimum bend radius should be avoided. Spring guards or stress relief sleeves may be required to protect against exceeding prescribed minimum bend radii.

Torsional Flexing

When equipment parts exhibit relative motion, hose connections should be located so hoses bend instead of twist.

Fitting Connections

Follow the fitting installation instructions provided in this catalog or enclosed with assembly equipment and described in product standards. Attach only the fittings specified for each hose design and do not mix components that are produced by different manufacturers. Proper fitting end selection is very important to eliminate twists and kinks in installed assemblies when connecting fittings to port connections. Swivel fittings are designed to allow for the hex rotation during tightening and bent tube or elbow fittings can eliminate kinks (Figure 3).

Torque Wrench Application

Use torque values where specified when tightening fitting connections to prevent leakage and damage.

Final Check Out

After components are assembled, purge entrapped air and pressurize system to maximum operating pressure. Inspect for leaks and proper function. Perform electrical conductivity tests on designs serving as static electricity discharge paths.

It is important that designers and users consider hose and hose assemblies as having a finite life. Therefore maintenance and replacement is usually necessary at specific intervals.

Maintenance Interval

Frequency of maintenance inspection should be determined by the system designer as well as user feedback based on the severity of the application, including service life data and risk potential.

Maintenance Program

Recommended maintenance should include the following steps as minimum practice:

Leakage

Turn off equipment and bleed down pressures prior to inspection to minimize risk to personnel. Inspect the full length of the hose and fitting connections for leaks.

Damage

Inspect hose for cuts, abrasion, cracks, blisters, kinked or crushed areas, heat degradation or cover looseness at the port or hose connection. Inspect hose guards for damage.

Electrical Continuity

In applications requiring the hose assembly to conduct static electricity to a ground connection, test hose assemblies using a megohmmeter in accordance with recommended procedures described on the permanently attached tag.

Replacement

Hose and/or assembly replacement should be considered at specific intervals under normal conditions. If leakage, loss of conductivity (when required), fitting separation and/or signs of damage are detected, the hose assembly should be replaced immediately.

Hose Routing

Under pressure, a hose may change in length. Always provide some slack in the hose to allow for this shortening or elongation. However, excessive slack in hose lines may cause poor appearance (Figure 4).

How to Assemble Permanent Hose Fittings

Synflex Mark IX Swaging Machine

Permanent Fitting Chart Insertion Depth Table

Hose I.D. (in)	Fitting Series Insertion Depth (in)	
	903, 90H, 90L 90A, 90N	906
1/8	9/16	-
3/16	25/32	-
1/4	1-1/16	7/8
5/16	1-1/8	-
3/8	1-1/4	1-1/4
1/2	1-1/2	1-1/2
5/8	1-9/16	-
3/4	1-11/16	-
1	2-1/16	-

1. Cut hose squarely with hand-held hose cutter 4523-04006 or bench-mounted hose cutter 4523-04007.

2. Mark hose for proper insertion depth into fitting. Use insertion depth chart or use insertion depth marker 45J0-04603.

3. Oil inside hose diameter with SAE 20 oil.

Consult Eaton's Technical Support for oxygen system special assembly recommendations.

4. Insert hose into fitting to depth mark. (Use vise block 4504-00000 or 4504-01000 and rubber mallet to ease assembly.)

5. Insert the specified die and pusher into the swaging machine.

6. Lubricate die swaging surface with SAE 90 gear oil. For stainless steel fittings use swage lubricant 4545-01001.

7. Insert hose end into the pusher.

8. Pull control lever and guide fitting into the die until the pusher bottom is against the top of the die surface.

9. Push control lever to retract pusher and open die halves. Remove swaged hose assembly.

How to Assemble Permanent Hose Fittings

Synflex SST Swaging Tool

Permanent Fitting Chart Insertion Depth Table

Fitting Series Insertion Depth (in)		
Hose I.D. (in)	903, 90A, 90H, 90L, 90N	906
1/8	9/16	-
3/16	25/32	-
1/4	1-1/16	7/8
5/16	1-1/8	-
3/8	1-1/4	1-1/4
1/2	1-1/2	-
5/8	1-9/16	-
3/4	1-11/16	-
1	2-1/16	-

1. Cut hose squarely with hand-held hose cutter 4523-04006 or bench-mounted hose cutter 4523-04007.

2. Mark hose for proper insertion depth into fitting. Use insertion depth chart or use insertion depth marker 45J0-04603.

3. Lubricate inside hose diameter with SAE 20 oil.

Consult Eaton's Technical Support for oxygen system special assembly recommendations.

4. Insert hose into fitting to depth mark. (Use vise block 4504-00000 or 4504-01000 and rubber mallet to ease assembly.)

5. Insert the specified pusher with the pusher retainer in the raised position. Fingertighten retaining screw to hold pusher firmly in place. Pusher must be allowed to rotate freely.

6. Place one die half into the base plate. **Lightly oil the inner surface of both die halves with SAE 90 gear oil. For stainless steel fittings use swage lubricant 4545-01001.**

7. Insert the assembled hose and fitting through the base plate and firmly into the pusher cavity. Place the other die half in base and lock into place by swinging clamps down firmly against top of dies. Rotate ball screw until fitting reaches the die.

8. With handle provided or 1-1/8 socket and ratchet, rotate screw clockwise until pusher bottom contacts top of die. Maintain pressure on ball screw and release die clamps. Slowly release pressure and rotate ball screw counterclockwise until it is clear of the die. Remove swaged assembly.

How to Assemble Reusable Hose Fittings

Synflex 3R80, 3E80, 37AL

* Consult Eaton Training for oxygen system assembly recommendations.

Reusable Fitting Chart
Insertion Depth Table

	Fitting Series Insertion Depth (in)	
Hose I.D. (in)	902, 904, 908	
1/8	21/32	-
3/16	27/32	27/32
1/4	1	7/8
5/16	1-3/32	1-1/8
3/8	1-3/16	1-1/4
1/2	1-5/16	1-1/2
3/4	1-1/4	1-11/16
1	1-11/16	-

1. Cut hose squarely with hand-held hose cutter 4523-04006 or bench-mounted hose Cutter 4523-04007.

2. Use the table (to the right) to establish the length of hose that is inserted into the fitting socket. Use a rule for measurement and mark the hose with a colored pencil.

3. Insert hose into vise blocks (4504-0000 or 4504-01000) and tighten to hold hose firmly in place.

4. Lightly lubricate the outer surface of the hose to make it easier to push the fitting over the hose. For mild steel fittings and standard hose, use SAE 20 motor oil. For stainless steel fittings use swage lubricant 4545-01001*.

5. Push fitting socket over the lubricated hose and screw socket on by hand counterclockwise until the socket end is even with the depth mark. The end of the hose should be 3/32 inch to 1/16 inch from the inner shoulder of the fitting socket. It should NOT be bottomed against the shoulder. Do not over-tighten.

6. Remove hose and fitting assembly from vise block.
7. Place fitting socket in the vise and lubricate the mating fitting threads.

8. Screw the fitting insert clockwise into the socket with a wrench until the bottom of the inserted hex contacts the socket shoulder. Do not over-tighten.

Instructions for using the Twin-Line Hose Separation Tool

CAUTION: Tool Contains a Sharp Blade. Do Not Put Your Hands or Objects Inside the Tool.

1. The De-Twiner tool 4574-01000 is designed to split twinned hose without any damage to the hose. Selecting the proper die is critical to operating this tool safely. The proper die can be selected from the provided chart. Customer service can assist in proper die selection. The hose should fit snugly in the die without extra play.
2. To insert the die into the tool, first remove the retainer pin. This pin should also fit snugly to prevent the die from moving. **DO NOT REACH INTO THE TOOL OR PUSH ANYTHING THROUGH THE TOOL TO REMOVE THE DIE!** The die extends out one side of the tool to allow ease of removal. Set the tool on its side with the long end of the die pointing up. Remove the die. Insert the new die from the same side and reset the pin.
3. Insert the assembled tool with die into a proper holding fixture (vise or other) and set stop at appropriate distance. The tool is cutting 2" before the exit end of the tool.
4. Apply a water soluble lubricant to the end of the first piece of product to be cut and slide it through the tool to the appropriate stop. Apply a few drops of lubricant to the end of each hose to be cut just before cutting. This will ease the cutting force and prolong blade life.

Blade Replacement

1. Replacement blades are available from Eaton performance plastics.
2. Use proper protective gear (cut resistant gloves) when replacing the blade. This blade is very sharp.
3. Remove blade retainer nut and slide out blade retainer bolt. Tip tool over and the blade should fall out from the top. **DO NOT TRY TO REMOVE IT FROM THE SLOT, THE MATERIAL SLIDES THROUGH.**
4. Insert new blade, bolt and nut. Tighten the locking nut only to the point that the bolt rotates as the product is cut. If it is too tight the blade and bolt will wear out prematurely.
5. The blade will last for thousands of cuts if properly installed and the operating procedures are followed correctly.

How to Separate Twin Line & Multi-Line Hose

Instructions for using the Twin-Line Hose Separation Tool

1. Remove the hose separation knife (4573-00000) from the handle and place in a vise at a 45° angle to the top of the vise. Fasten securely in the vise jaws.

2. Measure and mark the distance to be separated.

3. Lightly lubricate the hoses on both sides at the connecting web with a soap solution or lubricating oil. This step reduces friction between the knife blade and hose cover surfaces, plus keeps the knife centered during the cutting step.

4. Push the hose into the "V" notch on the knife blade using a rocking motion to start the hoses into the blade.

How to Separate Twin Line & Multi-Line Hose

(continued)

5. Hold the hoses together and aligned with the blade while first pushing then pulling them to the mark, taking care not to cut the hose covers.

6. Wipe lubricant from the hose.

7. Examine the hose cover material where the hoses were attached to ensure they have not been cut, or the reinforcement fiber exposed. If the hose covers shows signs of damage, the hose assembly should not be placed in service. If no damage is apparent, proceed with normal hose assembly.

Hose Size vs. Flow Capacity

How to Select the Correct Hose Size

The hose I.D. may be determined if the fluid flow rate and velocity are known by using the nomograph.

Nomograph data is based on the formula:

$$\text{Area} = \frac{\text{Flow Rate} \times 0.3208}{\text{Velocity}}$$

How to Use the Nomograph

1. Find the two known values.
2. Lay a straight edge to connect the known values.
3. The intersection point on the third vertical line identifies the point for that factor.

Example

A pump has a flow rate of 4 gpm. The necessary velocity is 10 fps. What hose size is required?

With a straight edge placed on 4 gpm and 10 fps, the answer is 1/2 inch hose I.D.

How to Use Conversion Tables

- Locate known unit symbol in left vertical column - FROM
- Locate the desired unit in top horizontal row - TO
- The factor at the intersection of the FROM row and TO column is multiplied by the known unit quantity to calculate the desired unit quantity

Example:

- Convert 3,000 PSI (psi) of a hydraulic pressure to kPa.
- Locate lb/in² row and kPa column in the Pressure Conversion Table; the factor is 6.895
- Calculation:
6.895 x 3,000 PSI = 20,685 kPa.
