

Technical Data Sheet

Product Group

Polyurethane topcoat

Characteristics

Product Information

A chemically cured, low VOC topcoat designed to provide premium gloss and distinctness of image (DOI). This coating has a balanced formulation to provide superior chemical and stain resistance, and flexibility. When used with AkzoNobel primers 10P20-44 (BMS 10-79, TY II & III, DMS 2104, Comp B, BAMS 565-008, Ty I & II), 10P20-44M or 10P20-44MNF (BMS 10-72 Type IX) or 10P20-12 (DMS 2104, Comp C), the Eclipse topcoat provides a durable, long lasting, protective and decorative finish that exceeds typical OEM requirements for exterior aircraft performance.

Surface Conditions

Cleaning

- Surface pretreatment is an essential part of the painting process
- Please refer to Eclipse application process standard for detailed instructions. Contact your AkzoNobel Aerospace Coatings technical consultant for assistance with this standard.

Instruction for Use

Mixing Ratio (volume)

Туре	Product code of base component	Curing Solution	Mix Ratio
Gloss	ECL-G-XXX	PC-233	2:1:1
Semi-gloss	ECL-SG-XXX	PC-233	3:1
Flat	ECL-F-XXX	PC-233	3:1
Non-metallic base	ECL-G-XXXX	PC-233	2:1:1
Non-metallic (Mica)	ECL-G-8XXXM	PC-233	2:1:1
Non-metallic Mica clear	ECL-G-8XX	PC-233	2:1
Non-metallic Mica clear	ECL-G-856	PC-233	3:1
Metallic	ECL-G-900	PC-233	2:1:1/2 (TR-111)
Clear	ECL-G-2**	PC-233	2:1:1
Clear	ECL-G-7	PC-233	2:1:1
Clear	ECL-GC-6*	PC-233	2:1

- *3 hour dry to tape time.
- **Note: ECL-G-2 meets performance of BMS 10-72. ECL-G-7 is the qualified Clear for BMS 10-72 Type IX.
- **Note: ECL-G-2 meets BAMS 565-002, ECL-G-7meets BAMS 565-009.
- See thinner options under Drying Times.
- Mix the base component thoroughly to a homogeneous state prior to the addition of curing solution and thinner/reducer.
- Stir the catalyzed and activated mixture thoroughly prior to application.

Induction Time

Note

The quality of the application of all coatings will be influenced by the spray equipment chosen and the temperature, humidity, and air flow of the paint application area. When applying the product for the first time, it is recommended that test panels be prepared in order to identify the best equipment settings to be used in optimizing the performance and appearance of the coating.

	Air pressure 35 45 PSI		

Number of Coats Apply Eclipse topcoat in two to three applications to a recommended dry film thickness of 2 3 mils (50 75 microns). More, if necessary to achieve acceptable hide.

Allow coats to dry in accordance with the table below before recoating: Recommended recoat time at 77° \pm 2°F (25 \pm 1°C) 50 \pm 5% RH)*

Thinner/Reducer	Recommended Re-coat Time		
TR-109	45	120 minutes	
TR-111	30	60 minutes	
TR-112	20	40 minutes	
TR-113	15	30 minutes	
TR-141	45	120 minutes	

*Note

*Note: Dry time refers to the elapsed time between the start of the first coat application and the start of the second coat application. Paint will transfer when touched and is not a cause for concern.

Number of coats Continued

Overcoat Window

When applying Eclipse, color on color, the overcoat windows must be observed

The overcoat window, before sanding is required, is 24 hours when TR-109 or TR-141 was used in the undercoat.

The overcoat window, before sanding is required, is 12 hours when TR-111 was used in the undercoat. If the undercoat has dried longer than the allotted time, abrade with a coarse Scotch-Brite® pad or non-stearate 220 grit sandpaper to break the gloss prior to the application of overcoat, markings and speed lines.

Note: the overcoat window will decrease as temperature and humidity increase.

Cleaning of Equipment Solvent Cleaning C28/15 or TR-15 (electrostatic equipment) Solvent Cleaning C28/15 or TR-19 for other spray equipment.

Physical Properties

Reducer Options

Various thinner options are available dependent upon dry to tape time required. At standard temperature and humidity conditions, TR-109 will provide the indicated dry to tape times with a wet edge time of 30-60 minutes. At standard conditions, TR-111 will provide a wet edge time of 20-40 minutes.

TR-112 and TR-113 are recommended for touch-up areas and speed lines only and are pre-adjusted to meet specific dry times. No additional accelerator should be added.

Drying Times (25 +/- 2°C / 77 +/- 2°F, 55 +/-5% RH)

Thinner/	77°F (25°C)	77°F (25°C)	90°F (32°C)	120°F (48°C)
Reducer	Pot Life	50% RH	40% RH	<u>10% RH</u>
TR-109	3-4 hours	10-12 hours	8-9 hours	4-5 hours
TR-111	1.5-2 hours	7-8 hours	4-5 hours	3-4 hours
TR-112	1-1.5 hours	5-6 hours	2-3 hours	1.5-2 hours
TR-113	0.5-1 hour	2-3 hours	1-2 hours	<1 hours
TR-141	3 hours	10-12 hours	7-9 hours	4-6 hours

Flash-point

Refer to the Material Safety Data Sheet (MSDS) for each individual component for specific flashpoint information.

Storage

Store the product dry and at a temperature between 5 and 38°C / 40 and 100°F per AkzoNobel Aerospace Coatings specification. Store in the original unopened containers. Storage temperature may vary per OEM specification requirements. Refer to container label for specific storage life information.

Shelf life 5 - 38°C (40 - 100°F) 24 months (Eclipse base, PC-233, TR-109, TR-111, TR-141) per AkzoNobel Aerospace Coatings commercial specification. 12 months for TR-112, and

TR-113, per AkzoNobel Aerospace Coatings commercial specification.

Shelf life may vary due to OEM specification requirements. Refer to container label for specific shelf life information.

Safety Precautions

Comply with all local safety, disposal and transportation regulations. Check the Material Safety Data Sheet (MSDS) and label of the individual
