

Royco® 634E CLP

CLEANER, LUBRICANT, AND PRESERVATIVE (CLP)
FOR WEAPONS AND WEAPONS SYSTEMS

Cleaning | Lubrication | Preservation – Single Product

Qualified to MIL - PRF-63460 rev. F

PROPERTY	TEST

Advantages

- Enhanced film strength to minimize wear
- Penetrates metal surfaces
- Aids in the removal of dirt and corrosion particles
- Forms a thin protective layer preventing future corrosion

Applications

Cleaning, lubricating, and preserving both small and large caliber weapons in virtually all climate conditions from -65°F to +150°F. In addition to ordnance use it can be used in a wide variety of applications including automotive, aviation, marine, and general plant maintenance of industrial equipment. Its advanced technology additives enhance film strength and anti-wear properties, penetrate between metal surfaces and aid in the effective removal of wear-related debris, corrosion particles and firing residues that can be abrasive to both recoil and gas operated mechanisms.
